

Chemlease® Mold Cleaner 1010W

Solvent-free mold and finished part cleaner

©2016 Chem-Trend L.P.

Description

Chemlease® Mold Cleaner 1010W has been developed to provide an effective solvent-free alternative to solvent washing for the removal of surface contaminants from molds and molded parts. Chemlease® Mold Cleaner 1010W is non-flammable and will not harm the surface. Chemlease® Mold Cleaner 1010W eliminates solvent washing when preparing parts for painting, bonding or other processes that require a completely clean surface.

Application

Chemlease® Mold Cleaner 1010W should appear uniform in container. If not, then shake or stir.

1. Apply a SMALL amount directly to the dry mold surface.
2. Using a damp paper towel, scrub the surface. Work with small sections until the entire surface is scrubbed.
DO NOT allow Chemlease® Mold Cleaner 1010W to dry on the surface.
3. Remove using only WATER. This can be done by rinsing with a wet cloth or water sprayer. Rinse until no residue remains; the surface should feel clean. Rinsing will highlight areas that require more cleaning.
4. Repeat until a waterbreak-free surface is achieved. You are now ready to apply a sealer and release agent.

Storage

Store product between 5°C and 30°C (41°F and 86°F). Shelf life is 18 months from the date of manufacture, in the original unopened container.

NOTE: Chemlease® Mold Cleaner 1010W needs to be carefully sealed when not in use in order to avoid water evaporation.

Use life of product is 60 days from opening of container. Product must be kept in the original container and the lid replaced immediately after dispensing. After opening, product should continue to be stored properly.

Handling

We believe Chemlease® Mold Cleaner 1010W has a low degree of hazard when used as intended.

For more information, request a copy of Chem-Trend's Safety Data Sheet.

Packaging

Chemlease® Mold Cleaner 1010W is available in a variety of package sizes. Please contact Chem-Trend customer service for details
