

Data sheet and product information

Fabric	2116 - VE 116P
Weave	Plain
Product Type (by Fiber)	E Glass
Warp Yarn (Type and Tex)	EC7 22 1x0
Weft Yarn (Type and Tex)	EC7 22 1x0
Warp End Count (Ends/cm)	23,6
Weft End Count (Ends/cm)	22,5
Weight (g/m²)	103,8
Thickness (mm)	0,094
TENSILE STRENGTH Warp (N/cm)	255
TENSILE STRENGTH Weft (N/cm)	243

This datasheet is intended as a general reference and not to be used as a specification. All information is believed to be accurate but is given without acceptance of liability. Some values could have been generated from limited data. The values listed for weight, thickness and tensile strengths are typical loomstate values, unless otherwise noted. Users should make their own assessment of the suitability of any product for the purpose required. All sales are made subject to our standard terms of sales which include limitations on liability and other important terms. The fabric style listed may not be available from inventory and minimum order quantities may apply.
